

## ***DZB-300C Automatic Cards Packaging Machine***

This model is independent research and innovation. It has the characteristics of fast packaging speed and stable feeding. It solves the technical problems of domestic flake material packaging, slow feeding and high scrap rate. It is widely used in food, pharmaceutical, hardware, daily chemical and other industries. It can automatically complete the whole process of feeding, bag making, sealing, printing batch number, finished product output and counting!

### **Features**

Compact structure, stable performance and simple operation. Double frequency control, the bag length is set and cut, no need to adjust the empty walk, one step in place, save time and film. Using imported electrical appliances, touch man-machine interface, convenient parameter setting, fault self diagnosis function, fault display at a glance. High sensitivity photoelectric eye color mark tracking makes the sealing and cutting position more accurate. Temperature independent PID control, better suitable for all kinds of coating materials. Positioning stop function, no sticking knife, no film. Simple rotation system, more reliable work, more convenient maintenance. All the control is realized by software, which is convenient for function adjustment and technology upgrade.

### **Technical Parameters**

Model	DZB-300C
Bag size (length)	65-330mm
Bag size (width)	30-110mm
Bag size (height)	5-40mm
Sealing strength of longitudinal seal and transverse seal	≥14
Packaging speed	120-300packs/min
Total power	220V、50Hz、2.9Kw
Overall weight	800kg
Dimensions	3500 x 900 x1500mm
