

XT-80PW Bag Packing Machine

Features:

1. Equipped with safe protection, comply with safety management requirement.
 2. Adopts intelligent temperature control, beautiful sealing quality.
 3. Adopts PLC servo system, pneumatic control system, big touch screen display control center, greatly improve the machine control precision, reliable and high intelligence.
 4. The touch screen can remember different product specification, when change product, no need the set the parameter again.
 5. If fault happens, it will automatic alarm and stop.
- It can be customized according to customer's requirement.

Technology specification:

Model	Vertical pouch packing machine
Packing speed(b/m)	40-60
Pouch size(mm)	L:45-180 W:30-140
Roller outside diameter (mm)	≤φ450
Max film width(mm)	220
Film thickness (mm)	0.05-0.10
Power(KW)	2.5
Voltage	220V/50Hz
Filling volume(g)	май.50
Machine size(mm)	1080*1000*1950
Machine weight(kg)	350
