

Paste Labeling Machine

This machine is specially designed for paste labeling of various 10ml-500ml cylindrical bottles. And it is mainly made up of conveyor belt, glue feeding sector, labeling part, and label pressing sector.

Bottles to be labeled are conveyed by conveyor belt or screw rods, and labels are sent by label box to the printing part where they are marked with batch numbers. Then they are sent to label belt by the sizing plate where they will be labeled.

Features:

1. Even sizing.
2. Rapid and accurate labeling.
3. One-year warranty period.

Main Parameters:

Type	Standard Type	High Speed Type
Production Capacity	3600~6000 bottle/hour	7200~12000 bottle/hour
Bottle Size	10ml-500ml	10ml-500ml
Pasting Rate	≥98%	≥98%
Pasting Solution	resin adhesive	resin adhesive
Electric Supply	380V/50hz, 3phase	380V/50hz, 3phase
Power	2kw	2kw
Size	1800×980×1600mm	1800×980×1600mm
