

BD-33 Automatic Powder Packaging Machine

BD-33 Automatic Powder Packaging Machine. Powder Packing Machine. The process of measuring, bag-making, filling, sealing, printing and cutting can be done automatically. The packaging machine can pack many kinds of material such as grain, powder, liquid and tablet, etc. Packaging Material: Various Laminate Film, for example: Polypropylene / Polythene, Polyester / Aluminum foil / Polythene, Polyester / Aluminum-plating / Polythene, Nylon / Polythene, Polyester / Polythene. Purpose: Powder kind: Milk powder, bean powder, condiment, humid pesticide powder, etc. It has key switch and digital display to achieve reliable and easy operation. Step motor is applied in bag-making system with high precision. With automatic intelligence tracking system, it can get rid of fake color mark, self-positioning and length-fixing automatically. The temperature is controlled intelligently by both heat-sealers. Packaging different material such as powder, grain, liquid and so on by changing filling mechanism. Lapel style bag-making mechanism. The calm and beautiful pillow-bag can be suited for wide range. Optional devices: The above machine may be equipped with hot stamp imprinting machine. The machine that has special bag-size or measuring requirement can be devised and produced specially.

Technical Parameters:

Model	BD-33
Production Capacity	18-55 bag/min (depend on the material and specifications)
Pouch Length	100-220 mm
Pouch Width	100-140 mm
Seal Style	Pillow
Filling Volume	10-500 ml
Measuring Method	Auger
Power	380V,50Hz,4.1Kw
Packing Size	1800*900*2800 mm
Packing Weight	650 Kg
