

## *MPC-LS Sleeve Shrink Labeling Machine*

### **Product Description**

1. Full cover stainless steel host: the whole machine is waterproof and does not rust
2. Adjustable cutter head: original rotary cutting, imported cutter, long life
3. Unitary central guide column: make the label guide more stable
4. Synchronous bottle divider: more stable bottle delivery
5. Label brushing group: the precision of the sleeve label machine is more accurate
6. Label control electric eye frame: the original tail fin and electric eye are combined to improve the cutting accuracy of film material.
7. Button control box: more user-friendly operation.
8. Independent feeding rack: the position of the rack can be freely selected.
9. Adopts PLC programmable controller, servo motor, servo drive, frequency converter, and sensor, and adopts positioning module to make the sleeve label accurate, fast, and stable.
10. Various bottle types, such as round bottles, square bottles, flat bottles, curved bottles, cup shapes, etc.

## Technical parameters

Model	MPC-LS
Main Engine Size	1100mm×1300mm×2000mm
Labeling Speed	100/250/400 bottles/min (three speed model)
Voltage	3P AC380/220V
Power	3kw
Labeling Accuracy	±1mm (Depends on product characteristics, hardness and roundness)
Applicable Bottle Diameter	28mm~125mm
Applicable Label Length	30mm~250mm
Applicable Label Thickness	0.035mm~0.13mm
Air Source Pressure	15mm-320mm
Label Material	PVC, PET, OPS
Bottle Type	round, square, oval, rectangular
Weight	700KG
