

HB 40S Automatic Stretch Banding and Shrink Wrapping Machine

HB 40S is an automatic stretch banding and shrink wrapping machine for cartons and blisters optimal for high speed operation, producing 40 bundles per minute through servo driven technology. High quality seal is provided for stretching resistance and if shrink-wrapping is required for certain products, a shrink tunnel is installed as an integral part of the machine.

Features

- PLC control system and HMI touch screen
- Balcony construction for separating mechanical part from operation part
- Servo driven system
- Fully automatic in-line with downstream machine or stand-alone operation
- Fast & easy format changeover
- GMP compliant design
- Available for 21 CFR Part 11

Specification

Model	HB 40S
output	40 rpm
bundle size	A: 60 - 300 mm
	B: 30 - 250 mm
	C: 65 - 150 mm
PE film	T: 40 - 70 μ m
	W: 40 - 150 mm
