

MIC-R30I Manual Tube Filling Machine

Soft tube filling and sealing machine (tube filling machine) is mainly used for plastic tube filling and sealing. It has been widely used in the fields of pharmacy, cosmetic, food, toothpaste, ointment and chemical etc.

This machine (tube filling machine) function is:

1. Manual loading tube
2. Automatic benchmarking
3. Automatic filling and no tube no filling and could be bottom filling system according to customer material viscosity
4. Automatic heating (inner heating and outer heating)
5. Automatic sealing and printing the date code
6. Automatic cut the over part after sealing then output finish product

This MIC-R30 SEMI-auto soft tube filling & sealing machine is a simple operate sealing filling machine with inside heat and outside heat heads. It has total 8 positions for filling and sealing. And materials such as paste, adhesives, AB glue, epoxy glue, skin cream, hair dye, shoe polish, toothpaste etc., are all applicable.

Parameter

Weight	250Kg
Power	220V/50Hz
Filling Quantity	20-70ml/
Air Consumption	<30 m ³ /min
Compressed Air	0.6-0.8Mpa
Dimension	1300*700*1400mm
Motor	4.5Kw
Capacity	20-30 tubes/min
Tube size	35mm
Quantity Error	<1%
