

## *Automatic High Speed Linear Bottle Washing Machine AHBW-T-120*

### **Salient Features**

- The machine is suitable for handling wash of different size of round bottles.
- Water re – cycling arrangement is possible as per requirement.
- The machine will be provided with SS pumps and SS tanks.
- Totally fabricated from SS materials with basic frame.
- Machine equipped with safety devices to ensure smooth and silent operation with high rated output.
- Machine totally rigid and withstands continuous operation for long working hours without any trouble.
- Washing chamber having various spray zones.
- Spray duration is electrically controlled by magnetic valve.

### **Optional Accessories**

- Heater – 3 Kw
- PLC & MMI

## **Technical Specifications**

- Production Rate: 120 BPM
- Power Specification: 5 H.P., 440 Volts, 3 Phase
- Overall Dimension: 2500mm X 1330mm X 1550mm
- Water Consumption: 400 Ltr./Hour
- Air Consumption: 21 CFM
- Pressure: 3 Kg.
- Net Weight: 1600 Kgs.
- Gross Weight: 2200 Kgs.
- CHANGE PARTS
- Bottle Holding Cups

## **Input Specification**

- Container Size: 30 ml to 200 ml
- Neck Size: 22mm, 25mm & 28mm(With the help of change Parts)
