

## *One step powder and granule high-speed packaging machine DC-338A8*

### **Features:**

This machine adopts single heat roller sealing method, and can make the pouches into three sides sealing, which is suitable for powder, granule packaging. With an inclined roller and installing of a specific shutter mechanism on the stuff device, accuracy can be controlled effectively. Moreover, sealing roller pattern uses continuous chess board, in this way the sealing is stable and reliable. There are optional device for measurement for example, volumetric cup and auger.

### **SPECIFICATION:**

Width	Length	Speed	Volume	Sealing steps	Electric power	Weight
30-90mm	30-160mm	60-150 pec/min	1-50ml	1 step	2KW/ AC380V	350KG

### **Suitable material:**

Various powder and granule flavorings, powder pesticides, granule foodstuff, tea and Chinese traditional medicine powder, etc.
