

HM SDKM 006 - Full Automatic Linear Filling and Capping Machines

Product Details

The machine consists of two units, filling and capping. Tin can, aluminum can, pet, coax, pvc and glass bottles can be filled electro-pneumatically volumetric by high accuracy dosage pumps. As for capping, it feeds various kinds of caps onto containers automatically and then screws or crimps the caps. In addition, it has nitrification and odor sucking aspiration systems as optional devices. The machine is able to fill products of pharmaceutical, cologne, homecare, shampoo, agricultural, natural and mineral oils etc.

Technical Specifications

Control Panel:	304 Stainless Steel, Electro Pneumatic System PLC Siemens and ABB, German made
Pneumatic System:	FESTO brand, German made
Filling Tank:	316 Stainless Steel, 150 liters
Filling group:	316 Stainless Steel
Chasis group:	304 Stainless Steel
Volume of Filling:	100 ml – 1.000 ml (can be upto 5.000 ml)
Capacity of Filling:	2000 – 3000 pieces / hour
Sensitivity of Filling:	± % 0.3 gr
