

WCA-150 *Series Pallet Wrapping*

WCA-150 Series Pallet Wrapping technical specifications:

- The WCA-150 Automatic Turntable Stretch Wrapper from Wulftec is a heavy-duty system designed for efficient and cost-effective wrapping of palletized loads.
- The use of this stretch wrapping system is simple.
- The pallet load starts to rotate once it is placed on the turntable in order to apply the stretch film and produce a safe and stable stack.
- Turntable stretch wrappers are ideal for wrapping stable loads.
- They are typically less expensive than rotary arm models and have a smaller footprint, which is a definite asset when space is limited.
- **Production Rate** - Up to 55 LPH.
- **Footprint** - Length: 3429 mm; Width: 5055 mm; Height: 2540 mm.
