

KZ100 Automatic Carton Opening & Packing Machine

This is the all-in-one Automatic packing machine, continuously complete the operation progress of carton forming, carton folding, carton gluing, carton sealing. Have the advantage of rational construction, stable performance, high productivity, adaptability features. Widely used in the beverage, food, daily products industry for carton packing.

Main character:

1. Machine designing according to technological process of production line, requirements of plane layout, beautiful appearance, good manufacturing process, Operation, adjustment and maintenance easy and quick. Have safety protection function, such as over current protection, safe exit, etc.
2. Flow chart & maximum bug indication, have a protection function.
3. According to the quantity of the boxes on the convey belt, automatically adjusts the operating speed
4. The whole structure consists of energy-saving aerodynamic components, controlled by the motor servo system, collaring structure supported by Germany FESTO\MS safety pneumoelectric interlock control. Have the shutdown alarm function when the machine operating under the condition of unstable air pressure or without electricity.

Technical parameters:

- Packing speed: 8-15 boxes / min
- Packaging size: Min: 200 × 120 × 105 (L×W×H)
- Max: 500 × 390 × 390 (L×W×H)
- Weight: 1600KG
- Table height: 800mm ± 50mm
- Rated Power: 4.31KW/380V
- Air supply: 5-6bar
- Machine measurement: 3500 × 2500 × 2450 ± 50mm
