

Horizontal Continuous Motion Cartoning Machine MKR-R

- 3 rotary heads with swaying pickup system and tri-party suctions enable the high speed and stable cartons picking.
- The forced carton forming system with assist suctions and each heads open arms in 90 degree and 150 degree.
- The timing adjustments at each stations are not required due to the rotary with swaying pick up system.

Features:

- Achieve Max speed 350 cartons / min.
- Machine installation area: Reduced 30% of machine installation area compared with a conventional type. (Our company comparison)
- The digital count hand wheels at the size change points enable to the quick size change and repeatability.
- Balcony type frame enables to find the falling objects in the machine easily.
- Realize the forced and stable carton forming with 3 rotary heads with swaying pick up and forming system.

Main specification:

Type	MKR-2.5R
Carton Size	W=20~45mm H=20~45mm L=70~200mm *W \geq H
Capacity	350 cartons/minute
Machine Weight	About 2,000kg
Electric	3kW (6kW)
Air source	0.5MPa/cm ² , 100 l /min (ANR)
Machine Size	W=1,620mm H=1,300mm L=3,600mm *W \geq H
Option	Automatic feeder leaflet feeder printing device, gluing device other inspection devices
