

Sachet Packing Machine DXDK1080

DXDK1080 Sachet Packing Machine is a servo-driven packing machine. The construction is stable, running smoothly, high speed, high precision measurement, easy to adjust, etc. At present, it is the most advanced four-side-sealing sachet packing machine for medicine in the Chinese market.

- All parts of the machine convenient to adjust, shortcuts and reducing the whole machine repair rate.
- It also can reduce the labor strength, increasing productivity, reducing the debug time in the process of debugging and product changes, reducing the rejection rate.
- Correcting double-side symbols, automatic tracking adjustment.
- A series packing program completed automatically that is making bags, measure, filling, sealing, cutting, easy tear notches, line-crow easy tear line, typing code, accountings and so on.
- One filling and automatically packing multilane bags is completed at the same time.

Parameter:

Item	Description
Bag size	L:50-180mm; W:35-120mm
Packaging material	Plastic/aluminum, paper/plastic, plastic/ Plastic composite film
Dose	Granule:1-30ml/bag Liquid:3-100ml/bag Powder:1-50ml/bag
Lanes	2-12 lanes(over 10 lanes suitable for liquid packaging)
Transverse cut-off frequency (times/min)	20-70 cuts/min
Maximum capacity	Up to 600 bag/min
Max packing film width	1100mm
Power	380V/50Hz
Total power(Kw)	19kW
Air consumption	0.2m ³ /h
Granule accuracy	±5%
Dimensions (L*W*H)	2400*2490*2270mm
Weight	2700kg
