

Heat Shrink Wrapping Machine LC-500A

Product Description

The sleeve-type heat shrink wrapping machine is made of high-quality steel or stainless steel. The structure is compact and reasonable, durable and energy-saving. The new plastic wrap machine is widely used in combination packaging of beverages, food, pharmaceutical, book, and chemical products. No need for bottom support, no matter square, round or flat, it can be packaged perfectly, the visual effect is very good, and the packaging cost is low. This shrink film packaging machine adopts PLC automatic control, man-machine interface tracking and accurate positioning. Bottles, flexible adjustment, safe and beautiful. Adjustable hot air circulation structure, applicable to various existing heat shrinkable films (including color printing), film replacement is quick and easy, fault warning, complete locking and reliable operation. Therefore, it provides a solid guarantee for constant quality, stable and reliable, and long-term continuous production.

Specification:

Model	LC-500A
Cutting type	Sleeve type sealing
Running speed	25 packs/min
Max packaging size	L: 320mm, W: 150mm, H: 200mm
Film	PE heat shrink film
Max film size	Width: 400mm, outer diameter: 280mm
Tunnel oven size	L: 1200mm, Entrance 450x220mm(WXH)
Tunnel conveyor	Teflon mesh belt conveyer
Conveyor speed	40m/min can be adjusted
Height of the plate	850-900mm
Air pressure	≤ 0.5 MPa
Main Power	9.5KW
Voltage	380V, 50-60Hz 3 phase
Weight	Approx. 600KG
