

Single Side Sticker Labeling Machine

The Single Side Sticker Labeling Machine is equipped with advanced process, which has longer service life for use and there is no special need of maintaining. Due to the high and reliable performance, it is specially used for flat labeling of various specifications of products, thus to ensure high and reliable performance. Equipped with a bottle separating mechanism, it realizes the function to make objects enter the labeling area at an equal distance. It can increase the front branching and closing mechanism and can also be used in connection with the previous production line. The sponge wheel automatically rolls the label to make the labeling more firm.

When the bottle reaches the position through the turntable, the positioning sensor of our Single Side Sticker Labeling Machine detects the positioning signal, the labeling head is installed on the bottle body, the rubber roller drives the bottle body to rotate, and then applies pressure to the sticker. It is helpful to improve the labeling accuracy, which can eliminate wrinkles on the label and improve the quality.

Product specification:

Producing speed	1000-10000BPH
Labeling accuracy	±1mm
Label max width	200mm
Label max length	500mm
Bottle min diameter	30mm
Bottle max diameter	100mm
Bottle min height	30mm
Bottle max height	360mm
Label inner diameter	φ76mm
Label outer diameter	φ400mm
Machine size (LxWxH)	3048x1100x1700 mm
Machine power	220V 50Hz 2000W
