

JDXD-110 Horizontal Automatic Packaging Machine

Pouch making, sealing and filling are relatively independent system. The two systems are connected by mechanical connection and PLC. Therefore, suitable for different packaging material and pouch sizes. Finished product sealing system uses hot seal packaging material to go on automatic pouch making, and so on. Pouches are flat bags of 3-side seal or 4-side seal. Selecting different filler can package different products.

Parameters

| | | |
|-----------------------------------|------------------------|--------------------------|
| Basic Parameter of Machine | Dimension | 2060*750*1400(L*W*H, mm) |
| | Weight | About 600Kg |
| | Power Supply | AC380V 50Hz |
| | Power | 2Kw |
| | Working Gas Source | 0.5MPa |
| | Air Consumption | 0NL/min |
| | Packaging Speed | 40-80ppm |
| Packaging Specification | Pouch Width | 50mm-110mm |
| | Pouch Height | 50mm-120mm |
| | Max packaging capacity | 60ml |
