

NJF-600C Hard Capsule Sealing Machine

Hard Capsule Liquid Sealing Machine is an overview of our own research and development, a new hard capsule sealing equipment, and has independent intellectual property rights and a number of invention patents. The device can be applied to the sealing of the filled (liquid, granule, powder, etc.) hard capsules, so that the products are always sealed during packaging, storage and transportation. Effectively prevent the loading of volatile drugs, increase the shelf life of the drug, thereby improving the stability of the capsule and the safety of the drug.

Introduction:

1. The equipment adopts man-machine interface control system.
2. The sealing mechanism adopts the servo motor lifting device, which can be used to jog and fine-tune the rubber wheel to achieve the best effect of the sealing layer.
3. The sealing liquid tank is designed as a sealing structure, and is equipped with a heating and heat preservation system to ensure the viscosity of the glue liquid and effectively extend the glue liquid circulation period.
4. The finished dry curing mold adopts hanging type and free rotation structure, which effectively improves the disassembly and unloading cleaning time.

Specifications:

Production output	36,000 / hour
Adapt to capsule	00-4# gelatin, veggie capsule
Template die hole	e 6 holes
Sealing material	Powder, pellets, granules, liquid
Input power supply	Three-phase 380V/220V 50Hz
Total power	4KW
Switchboard weight	1200KG
Dimensions	2800*900*1900mm (length * width * height)
Environmental requirements	20 °C or so (room temperature) humidity 40% -55%
