

Semi Double Position Two Sides Vacuum Packing Machine ZD-5Z

0.5-5kg semi automatic flatten shape Vacuum Packaging Machine. It can realize two sides vacuum packaging, and also realize double station work at the same time. Commonly used in the food industry, such as: semi Rice Packing Machine, semi flour packing machine and semi Beans Packing Machine.

Auto Finished: Weighing-Filling-Cubic shaping-Vacuumsing-Heat sealing-Discharging-Conveying
Easy operate: touch screen control, within 3 min change mould without any tool

Brief Introduction:

1. Plastic bags quantitative packaging for dry particulate materials in industries of grain, food, pharmaceutical, etc. with two-sided vacuum shaping function.
2. OMRON is used in PLC (programmable logic controller) and human-machine interface, with high reliability, friendly interface and simple operation.
3. The weighing part uses high-precision sensors and intelligent instrument, with high accuracy and high speed.
4. Simple structure, reliable operation, and easy maintenance with the imported pneumatic components.
5. Fault Display and Online Help System.

Application:

Plastic bags quantitative vacuum packaging machine for dry particulate materials in industries of grain, food, pharmaceutical, etc. with two-sided vacuum shaping function.

Technical Parameters:

Model	ZD-5Z
Work Temperature	0-40°C
Work Humidity	<90%
Rated Packing Weight (kg)	02.05.2005
Division Value (g)	2
Packing Accuracy	X(0.2)
Packing Speed(bag/h)	480-600
Power	AC380 50HZ 4KW
Air	Compressed Air 0.5-0.7MPa
