

3D Cellophane Wrapping Machine

3D Cellophane Wrapping Machine is flexible, the packaging efficiency is high, and the production effect is enhanced.

Advantages and Features:

1. The transparent film three-dimensional machine packaging machine has the characteristics of simple operation, compact structure and low noise, which is suitable for outer packaging of various shape boxes, which is a new package.
2. Automatic push, fold, and hot seal.
3. Simple model, easy to understand and operate.
4. The packaging is flexible, the packaging efficiency is high, and the production effect is enhanced.
5. Film outer packaging, waterproof, moisture-proof, oil, anti-fake, can effectively protect product quality, extend product life, and enhance product attraction.
6. Steady operation, first-class procedures, avoid old cosmetic box packaging machine system.
7. Straight-line feed mode is more scientifically human, more convenient, conveyor belt synchronous intermittent or continuous work, anti-grinding and flower design, and more beautiful packaging products.

Technical Parameters:

Working Speed	20-60/minute
Box Size	L50-260mm, W40-180mm, H20-80mm
Film	L145-450mm
Power	380V/50Hz/11KW
Pressure	0.6MPa
Inlet Pipe Diameter	φ8
Measurement	L2300mm*W860mm*H1640mm
