

## ***KGZ-2DC Granule Filling Machine Electronic Steelyard Weighing***

KGZ-2DC granule weighing filling machine is fully automatic by electronic steelyard weighing type. This weighing filling machine is suitable for various kinds of granule, small particles and irregular materials packing. It is widely used in food, seed, medical and chemical industry.

### **Main feature:**

- The use of bucket electronic weighing technology, packaging error, high precision.
- Two buckets of electronic weathers or four buckets of electronic weathers are used for pre-weighing, and the hoppers of the containers are automatically opened.
- The use of cans or bottle containers, automatic feeding system can be configured to achieve no bottles, bottles are not canned.
- The structure and layout of the whole machine are reasonable, the variety of packaging is changed, hygiene and convenience are eliminated.

### **Technical parameters:**

- Model: KGZ-2DC
- Measurement mode: electronic steelyard
- Filling range: 30-2000g
- Accuracy tolerance:  $\pm(0.2\%-0.5\%)$
- Packing speed: 10-30bags/min
- Weight of machine: 300kg
- Power supply: AC380V 50-60Hz/2.0kw
- Machine dimensions: (L)2400×(W)1180×(H)2230mm
- Container size: cylindrical chamber  $\phi 20-180\text{mm}$  (h)50—350mm
