

ZHG Solid Preparation Granulating Drying System

This is an closed-wide automatic granulating production line, it includes rapid mixer granulator, fluid bed dryer, screener, and the grinding granulator to get high quality dry granules for good preparation processing.

Features:

1. PLC control for high automatic operation and easy maintenance. Save cost and labor charges.
2. Avoid environment pollution. Fully closed working chamber, pipeline connection, quick clamp connector, free of blind corner, convenient dismantling and easy cleaning. GMP standard.
3. Trolley type granular separating apparatus, convenient and flexible for installing.
4. Fully made of stainless steel and material contact parts are made of SUS316L.
