

Stainless steel inclined ball mill FQQ

Inclined ball mill made of stainless steel, as the name implies, is made of stainless steel, so it is shiny and durable form. Depending on performance, this equipment presents two models: FQQ10 and FQQ20. This equipment is mainly used in the pharmaceutical, chemical, food and metallurgical industries.

Characteristics:

1. Inclined ball mill of stainless steel does not affect on the environment, does not damage or contaminate it.
2. This setting can mix materials 2 or more substances.

Technical specifications:

Model	Capacity (l)	Quality milling	Rotation speed (\ m)	Power (kW)	Dimensions (mm)	Weight (kg)
FQQ10×2	10(l)×2	≥200	48	1.1	1080×470×630	≈250
FQQ20×2	20(l)×2	≥200	70-80	1.1	1200×470×875	≈300
			95-105
