

## *JKX-12 Automatic Carton Opening Machine*

### **Product introduction**

- 1.1 Using independent intellectual patent producing, and choosing imported particles, electrical element and pneumatic component;
- 1.2 Using vertical storing carton, and supplement carton at any time, no stopping machine.
- 1.3 Adapt at the same time, same type carton size using, changing carton specification, adjust by hand, time:1-2 min
- 1.4 Reasonable design, sorting as model same step, folding bottom and sealing bottom same step as model;
- 1.5 Compact size, mechanical function precision resistance, working procedures no shaking, operating steady and high efficiency;
- 1.6 Assemble blind protection device, avoid seriously injured when operation;
- 1.7 Can work as single machine, and also can be used attached with automatically packing line.

### **Product technical data:**

<b>Speed</b>	12 box/min
<b>Carton size</b>	L280-550×W160-400×H100-400mm
<b>Power</b>	110/220V, 50/60Hz, 1 Phase
<b>Electricity supply</b>	200W
<b>Tape size</b>	W48/60/75mm (choose)
<b>Machine size</b>	L2050×W1950×H1450mm
<b>Machine weight</b>	400kg
