

## *MS-24W High-speed Automatic Plastic Dropping Machine*

### **Basic Equipment**

Control system: Imported PLC+Temperatur control module+Imported touch screen

Air drive system: Import SMC

Extrusion system: Hardened-gear speed reducer+Inverucer+Inverter+Energy-saving heater

### **Function:**

- Low pressure alarm/mould data storage
- Temperature PID control, make sure the high quality and high accuracy of plastic products
- If the electric heating temperature do not reach at the setting temperature, the cold slug prevent from starting.
- Monitor, calculate, alarm, self-diagnosis failures device.
- Temperature deviation alarm plastic drop detection system is optional

### **Technical parameters**

- Min.cap diameter: 25mm
- Max.cap diameter: 30mm
- Min.cap height: 10mm
- Max.cap height: 30mm
- Daily output: 720000-860000 caps

- Total power: 12.8kw
- Voltage: 3AC/N/PE 220V/60Hz 380V/50Hz 415V/50Hz 440V/60Hz
- Compressed air: 08MPa 1.5m<sup>3</sup>(self-supply)
- Mold number: 24cavity
- Contour dimensions: 6500x1800x2600mm
- Machine weight: 3T
