

## *Full Automatic Packaging Machine for Granules*

1. Advanced performance, high strength, low noise, compact structure, stable operation, convenient maintenance and long service life.

2. High degree of automation: this machine can be finished from longitudinal sealing, longitudinal cutting, transverse sealing, and filling, marking batch number, cutting easily, and cutting broken line, crosscut until the finished bag output at one time.

3. Packing of several bags with high speed and hot sealing, four edges of sealing, and the bag type is flat and elegant, with high packing efficiency.

### **Technical parameters:**

1. Packaging measurement: 2-50g
2. Packing speed: 120-300 packages/min
3. Maximum width of packing material: 480mm
4. Core diameter of packing material: 70mm
5. Total power: 3.2kw
6. Power supply specification: 380V 50Hz
7. Equipment weight: 600KG
8. External dimension: 1100mm x 1200mm x 2200mm
