

Multi-Functional Cookies Machine

It has characteristics such as modern techniques, Multi-functional Cookies Machine compact structure, multifunction, easy operation etc. It is one of the most ideal food machines and it is well welcomed by lots of food manufacturers and investors. With many kinds of moulds, this machine can produce dozens of designs of cookies. Customers can make their own choices have unique forms and attractive appearance. The cookies made by this kind of machine can be baked through hot-wind rotary ovens or tunnel ovens.

Flow Chart:

Mixing->Forming->Baking->Cooling->Packing

Parameter:

- A. Capacity: 80-180kg/h
- B. Function: Intermittent extruder, wire cutting
- C. Max Turn Angle: 400°
- D. Voltage: 380V 50HZ
- E. Power: 1.1Kw
- F. Tray's Size: 400*600mm
- G. Dimension: 1460 * 960 * 1240mm
- H. Weight: 1200kg
- I. PLC

Features:

- 1) Multi-functional Cookies Machine Gas, Diesel, Electric baking
- 2) Extruder, wire cutter
- 3) PLC controller
