

(sample package)

The **FD11** are automatic machines for the production of suppositories and ovules in strips of aluminium and/or thermoformable plastic. The cavities can be of different cut and volume according to the client's requirements. Production up to 11.000 suppositories-ovules/hour.

Packing materials (PVC; PVC + PE; PVC + PVDC + PE; duplex (ALU + PE); triplex (PP + ALU + PE))

<b>FD11</b>	
Production	11000 Unit/hour
Maximum power absorbed	7,5 kW
Electrical infeed	400V 3p+N+PE
Compressed air pressure	800 Lit/min
Pneumatic energy	6 bar
Length	2370 mm
Width	1050 mm
Height	1680 mm
Weight	750 Kg
