

SP-50BF Automatic Coffee Packing Machine

Performance characteristics:

1. Packing machine controller character display, reliable and simple operation;
2. Back sealing bag;
3. The bag making system adopts stepper motor subdivision technology, which has high precision in bag making and the error is less than 1 mm;
4. Photoelectric control system has strong anti-light and electric interference;
5. Adopt four-way temperature-controlled heat-sealing mechanism, accurate temperature control, good heat balance, guaranteed sealing quality, applicable to a variety of packaging materials;
6. Using the latest hopper lifting device, easy to adjust, conducive to cleaning, improve work efficiency.

Performance parameters:

Model	SP-50BF
Packing speed (bag/min)	30-60
Measuring range (ml)	1-50g (Replace the screw)
Bag size (mm)	L 50-140 W 20-105 (replace the shaper)
Voltage	Three-phase four-wire system 380V/50Hz
Power (KW)	2.1
Weight (kg)	240
Dimension (mm)	665×770×1640 or 665×1000×1640 (with print)
Packing material	Various composite film packaging materials
Outer diameter about the material	No more than 300mm
