

High Efficiency Noodles Weigh Filler Packaging Machine HKJ-A-001

Our noodle packing machine can automatically finish the process of weighting, outputting, filling and sealed packing of noodles and spaghetti

Advantage:

- I. Our noodle packing machine use high-quality imported components, Chinese characters supporting touch screen, PLC, which is easy to operate. Machine speed is controlled by inverter and can work synchronized production with other system. with anti-theft device.
- II. Adpoted latest technology and massify design. Long operating life
- III. Weighting machine use Chinese characters supporting touch screen, PLC, which make the packing speed faster and more accurate. It is the perfect substitute products of the traditional packing machine
- IV. Spare the manpower, Improve productivity: Daily outputting 30t/5 person
- V. Saving material resource.
- VI. Reduce the chance of the long-term contact of human body or still can be opposite through food healthy generation harm.

Technical specification:

| | |
|------------------|---|
| Work object | noodle, spegahtti, pasta |
| Noodle length | 200g-500g (180MM-260MM)+/-5.0MM 500g-1000g (240MM-260MM)+/-5.0MM |
| Noodle thickness | 0.6mm-1.4mm |
| Noodle width | 0.8mm-3.0mm |

| | |
|--------------------------------------|---|
| Packing capacity | 30-70bags/min |
| Measurement range | 200g-500g;200g-1000g |
| Measured value is set | Digital input |
| Measured value display | Accurate to 0.1g |
| Zero adjustment | Automatically or manually |
| Measurement accuracy | 200g-500g +/-2.0g(within) 96 percent 500g-1000g +/-3.0g(within) 96 percent |
| Capacity and accuracy of measurement | differs from the quality and the unit weight of the noodle |
| Equipment size | 6700mmx3400mmx1650mm |
| Power | AC220V/50HZ5800W |
