

## *JH711/1200-A Automatic Vacuum Forming Machine*

JH711/1200-A Automatic Vacuum forming machine with big forming area is designed by the principle of mechanical-electrical-pneumatic integration. It adopts PLC control system, panel and digital power control. This full-automatic forming equipment for forming plastic sheet includes feeding, heating, forming, cooling, mold ejecting, cutting at one blow. This machine has luxury configuration and gets reliable performance and handy operation.

### **Application:**

It is suitable for forming PS, HIPS, PVC, PET, PP, flocking sheet that can produce varieties of blister package and blister tray. For example: curatorial injection tray, oral liquid tray, mobile telephone tray, cookies tray, one-off tableware etc...

### **Technical Parameters:**

Model	JH 700/1200A-1
Length of forming	760-1200mm
Width of forming	500-700mm
Height of forming	≤165mm
Production Speed	60-720Cycles/h
Power of oven	24KW (Upper Oven)
Power of vacuum pump motor	3Kw
Vacuum pump capacity	100m <sup>3</sup> /h
Power of air compressor	15Kw
Air displacement of air compressor	2m <sup>3</sup> /min
Voltage	380/220V 50HZ
Overall dimensions	7950*1450*2550mm
Weight	3000Kg
