

PET Bottle Capping Machine JF-D904

It has been widely used in anti-theft cap the industries such as pharmacy, food, chemical engineering, etc., It is fully conforming to GMP certification requirements.

Introduction

PET Bottle capping machine is the important equipment for the production line of bottle capping preparations. It is used for arranging caps on bottle filling mouth.

Children resistant cap capping machine it can be used not only for stand-alone production, but also an ideal model for connected production. Can be easily upgraded to a complete automatic capping machine ASP, we have lifting, swash plate, oscillating and other capping systems, which can be selected according to actual needs

Automatic screwing capper speed of the host adopts imported frequency converter, which can carry out stepless speed regulation

Main Features

1. Accomplish cap ordering, cap adding, cap pressing automatically
2. According to customer's different cap, design specialized capping away.
3. With touch screen and PLC, operation is very easy, Ensure more stable operation and easier handling
4. Wide applicability, simple convenient, if change bottles and caps, adjust some Part

5. Self-diagnose errors and stop working to make alarm at errors and missing bottles, caps. It keeps the working process continuous and inerrant avoids any waste of materials.

6. Fully automatic operation, intelligent interconnection with before and after process, good coordination, no need for special operation, saving labor.

Technical Parameters

Item	JF--D904
Applicable target	15-500 ml round square, flat and special shape bottles
	Common caps, protective ring caps etc
Production capacity	50~150 bottles/min
Description for production capacity	Capacity is subject to the type and size of the bottles
	● BPM=Bottles per minute
Power consumption	220V/50HZ/ 1.8KW
Size(mm)	2350×1400×2100mm
Material	304 stainless steel
Control System	PLC control
Pressed Air Supply	0.6 Mpa
Weight	580Kg
