

## *Inclined Chain Plate Conveyor*

Inclined Chain Plate Conveyor is used to transport solid granule or bulk materials to the next process.

Transmission speed can be adjusted according to clients' demand.

### **Characteristic:**

1. No damage to material, easy to clean
2. Adjusting the transmission speed according to customers 'demand and easy to accommodate other equipment
3. Upscale appearance, compact structure, easy operation and maintenance
4. Almost no damage to the products, operating area free from contamination

### **Technical Specification**

- Convey height: 4000mm (adjustable)
- Scraping belt width: 300-450mm
- Flapper height:100-120mm
- Material: 304#SS
- Conveying volume: 3~6m<sup>3</sup>/h;
- Power Supply: 380V, 50/60HZ, three-phase supply , 7.5KW
- Gross weight: 450KG
