

Double Head Automatic Sleeve Labeling Machine MST-500B

MST500B shrink sleeve labeling Machine is a new type of advanced heat shrink sleeve wrapping machine, it is four-wheel drive, automatic centering, four-wheel balancing pressure device. To achieve a smooth, stable, fast delivery purposes.

Electrical configuration description: This type of labeling machine used by the electrical appliances are imported configuration, using high-speed positioning module, imported servo motor, servo drive, servo controller, automatic adjustment, user-friendly operation.

Label Type: This model speed can be 250Bottles/Min, applicable to all kinds of bottles of Fruit Juices, Tea Beverages, Dairy Products, Pure Water, Beer, Sport Drinks, etc. it have advantage of high accuracy of labeling position and after shrink it can make the bottle shape more prominent.

Double head Automatic sleeve labeling machine

According to market demand, developed a double head structure can meet the bottle body at the same time set the label, can also be used Parity set of standards to improve efficiency. One machine dual-use, save cost, improve production efficiency, save the equipment area.

Technical Parameters:

Model	MST-500B Shrink sleeve labeling machine
Power	4KW
Input Voltage	380/220vac
Labeling Speed	2x250 Bottle per minute
Applicable body diameter range	Φ28-φ125
Applicable label length(mm)	30-250mm
Applicable label thickness(mm)	0.03-0.13mm
Paper tube diameter(mm)	76mm, 127mm, 152mm adjustable
Machine size (mm)	3200Lx1200Wx2200H
Weight(kg)	450kg
