

## *Liquid Packing Machine THB-7*

The machine is widely used in water, milk, soy milk, all kinds of beverages, soy sauce, vinegar, rice wine and other liquid film packaging; UV sterilization, bag in full bloom, print date, quantitative filling, sealing cut off, automatic counting one-time automatic Complete, heat sealing temperature using automatic control, packaging products beautiful and reliable, shell, pipe, sterilizer, quantitative pump with stainless steel structure to ensure health.

### **Function:**

1. The choice of domestic high-quality components to ensure that the machine low failure high stability.
2. Seal products in various forms, in the closure, side seal, four sides of the closure, wide side seal, and so on.
3. Any adjustment bag length, do not need to replace parts.
4. Heat sealing temperature dual control, to ensure accurate temperature.
5. Automatically print in the seal 8-digit production date.
6. The use of advanced optical tracking control bag length, to maintain a complete pattern, the number of packaging using electronic counting.

**Technical parameters:**

<b>Model</b>	<b>THB-7</b>
Bag style	Back seal or 4 side sealing
Packing speed	30-60bags/min
Bag size	Customized according to customer requirements
Filling range	20-1000ml
Filling accuracy	+/-1.5%
Voltage	220v/380v
Weight	460kg
Installation dimensions	1080*910*2050 mm
