

Rice Bagging Machine TH-PM-G-5

The rice bagging machine can complete automatic bottle positioning, filling and metering. It is controlled by PLC and touch screen, which is easy to operate and has high stability. The touch screen can be customized for different language. The machine doesn't have any requirement about the bag, you can choose any type bag.

Features

1. Brand new highly integrated modular control system.
2. The automatic amplitude adjustment function makes debugging more convenient.
3. It can weigh a variety of different materials at the same time to realize the packaging of mixed materials.
4. According to the production situation, the parameters can be directly modified during operation, which is easy to operate.
5. The rice bagging machine adopts a stepless vibrating machine feeding system to make the material more uniform and the weighing range larger.
6. Food grade stainless steel body, dual choice of photoelectric sensor and foot switch.

Optional parts

1. Rice bagging machine is configured with Automatic conveyor
2. Heat sealing machine
3. Four weighers or sixer weighers

Parameter:

Model	TH-PM-G-5
Power supply	400W, AC380V, 50Hz
Filling capacity	50g - 5000g
Filling speed	800-1500 bags/h
Filling weight accuracy	≥99.5%
Machine size	0.9*0.8*2.2m
Machine weight	220kg
