

Barrel Filling Machine QGF-series

QGF Series barrel machine is specially used for 3/5 Gallon barrel drinking water. This machine combined washing/filling/capping into one machine. Mainly used for filling mineral water/distilled water/pure water and so on.

Characteristics:

The parts with touch water adopt high-quality stainless steel. The cylinder gear runs smoothly and the fixed position is correct. It adopts inserting-type washing technology to remove washing blind angle.

Product Description:

- 1) The machine combines the functions of rinsing, filling and capping.
- 2) Whole body of the machine is made of stainless steel with anti-corruption and easy-rinsing.
- 3) The main electrical parts are from Siemens and Omron.
- 4) Pneumatic parts are imported.
- 5) Rinsing nozzles adopt American spraying system technology.
- 6) With compact structure, high efficiency and stable operation, this is a highly automatic unit with machine, electricity and pneumatics in one machine

Technical Specifications:

Model	QGF-300	QGF-450	QGF-600	QGF-900	QGF-1200
Filling heads	2	3	4	6	8
