

External Type Vacuum Pack Machine – CE-600E/DZQ

CE Desktop electric inflator outside pumping vacuum packing machine, vacuum can be inflated with a suction seal, direct sealing, inflatable seal three functions, it is a versatile machine, bag sealing size not more than 80cm to the outer vacuum machine no volume space restrictions, using a wide range. This machine is easy to operate, energy, fast, low-cost, easy maintenance, and can be used for food, medicine, native products, electrical appliances, department stores and other extraction industries, inflatable packaging items.

Technical Parameter:

Model	CE-600E/DZQ
Voltage	220V, Single Phase
Power	1.6 KW
Type	Vertical pumping
Sealing form	horizontal vacuum sealing
Sealing length	600mm
Sealing width	10 mm
Sealing table height	850 mm
Load-bearing platform	40 Kg (Removable)
Height of table	680-820mm (Adjustable)
Control method	foot switch
Material	Main body carbon steel paint, the whole machine is made of stainless steel
Machine weight	85 Kg
Machine dimensions (LxWxH)	1060 * 680 * 1030 mm
