

## *Ultrasound Sealing Tagging and Labeling Machine USTL01*

This is our labeling and tagging machine, the machine adopt ultrasound sealing, it makes nylon tagged mesh with thread and tag, and making roll tagged material used on the pyramid tea bag packing machine. It is suitable for different material like Nylon mesh, biodegradable PLA corn fabric mesh, non woven mesh, PET mesh etc.

### **Parameter List**

Suitable material:	Nylon mesh, biodegradable PLA corn fabric mesh, non woven mesh, PET mesh etc
Film width:	120mm, 140mm, 160mm plain roll material, 20mm*20mm square tag
Thread length	130mm, 150mm, 170mm etc
Sealing method:	High frequency ultrasound
Speed:	70-80tags/min
Air source	0.6Mpa, 0.35M <sup>3</sup> /min
Electricity	220V, single phase, 50Hz, 3.2Kw
