

PLC controlled time gravity filling machine

Hot PLC controlled time gravity filling machine - Grepack is the best PLC controlled time gravity filling machine supplier in China.

Description:

This product bulk supply is pumped into a holding tank above a set of pneumatically operated valves.

Major Characteristics:

This product bulk supply is pumped into a holding tank above a set of pneumatically operated valves. Each valve is independently timed by the filler's master computer so that precise amounts of liquid will flow by gravity into the container.

Gravity fillers built with bottom up fill capability can handle a wide range of flow able liquids including foamy products. it is used international famous brand electrical and pneumatic components, Automatic controlled by computer (PLC), touch screen control panels, and high-quality stainless steel frames, easy operating, Little noise, long service life element, High reliability, metering regulate accurate and handily. This machine also applied to GMP standard requirement.

Technical Parameter:

- 1) Power Supply: AC 220V or 380V; 50Hz
- 2) Power: 1.5KW~2KW
- 3) Production Capacity:
 - 100 ml 6000 bottle/hour
 - 250 ml 5500 bottle/hour
 - 500 ml 4500 bottle/hour
 - 1000 ml 2500 bottle/hour
- 4) Pneumatic (air -Cooperated) source: 0.33-0.50 Mpa clean and Stable compressed air
- 5) Material density: 0.6-1.3
- 6) Weight: 480 Kg
- 7) Dimensions: 2000mm × 1100mm × 2200mm
