

DTG-350B Automatic Tube Filling and Sealing Machine

This machine is widely used in cosmetics, toothpaste medical cream, food shoe shine and adhesive industry It can be used for laminate and plastic tubes filling sealing and coding, On the basis of DTG-350A model, automatic pipe feeding device is added to realize further automation

Features

- Hot air heating system filling range is adjustable
- Filling stops in absence of tube
- PLC system and HMi control system
- Auto bench marking filling and exit

Technical Parameters:

Power	220V/50Hz
Rate	3.75KW
Air Source	0.6-0.8Mpa
Tube dia	Φ13mm-50mm
Tube Length	50mm~250mm
Filling Range	5g-250
Filling Speed	30pcs-45pcs/min
Filling Precision	±1%
Hopper Size	30L-50L
Contact part	Optional
Mixing and Heating	Optional
nitrogen System	Optional
