

XF-FS L-Bar Sealing and Shrinking Machine

The machine adopts "L" type air operated sealing and cutting, tunnel is heating recycle design, small size but has a high efficiency, save energy and save time. It's suitable for batch shrink packaging in such industries as software, biscuit, printing, pharmacy, floor, Chinaware, beverage, beer. The machine is suitable for shrink films including PVC, PP, and POF.

Character:

1. Fast install film system.
2. The height of sealing rubber can be adjusted according to sealing bar and products. In this way, the products will have the shrink effect.
3. The height of shrink tunnel can be adjusted according to sealing-bar so that it assorts the height of sealing rubber.
4. Automatically operate can be chose.
5. Designed inside sirocco recycle, small size but has a high efficiency.
6. Equipped with prevent hands from cutting safety system. The height of L bar sealer can be adjusted according to hand-wheel.

Technical Parameter:

Max packaging dimension	L 500 W 400 H 200
Capability(pack/min)	10-15
Machine dimension(mm)	2575×800×1550
Voltage	220V/1ph
Power	10KW
Weight	410kg
