

DH-JF-2 Induction Sealing Machine

It is new generation production which adopts electromagnetic induction technical. The machine is economical and easy to operate. It uses widely in food& beverage, Pharmaceuticals and chemical industry etc. This fully automatic sealing machine can seal the mouth of container with aluminum foil at speeds up to 60 cpm.

Key Features:

- Sealing speed up to 120 CPM
- Heavy duty construction
- Auto stop and alarm when lack of water
- Operation stable & less noise
- Automatic reject caps without aluminum foil

Specifications:

Sealing speed	50-60cpm (based on the diameter of bottleneck)
Diameter of bottle opening	Φ30-90mm
Dimensions	1600mm×800mm×1160 mm (Length × Width × Height)
Weight	180kg
Electrical Requirements	Power: 2000w, Voltage: 220v, Frequency: 50-60HZ (Optional)
Working direction	Left → Right or (Right → Left)
