

## GCF18-4 Juice Can Filling Sealing 2 In 1 Machine

The machine is mainly used for filling and sealing of cans with non-gas containing liquid as various fruit juices, tea, mineral water, soy sauce, vinegar etc. It has such advantages as advanced construction, stable working, convenient operation and repair & maintenance, transducer control as well as high production efficiency. It is the ideal equipment for mid-scale & small-scale factory.

### Feature

1. It is designed according to the actual situation of domestic canning plant and the most advanced congeneric technology of filler and capper in switzerland.
2. It is the new generation combined machine. It is pneumatic control and automatic capping. Frequency conversion timing controls the output. The equal liquid level technology controls the filling.
3. In order to make the appearance more clear and beautiful, it is made of the stainless steel ( $\geq 95\%$ ).
4. To enhance vacuum degree, we can equip steam-jet device as the clients' request.
5. It is equipped long-distance computer control system to sustain the customers completely.

### Technical Parameter

Model	GCF12-1	GCF18-4	GCF24-6
Production capacity	1000-2000C/H	6000-10000C/H	10000-15000C/H
Filling heads	12	18	24
Seaming heads	1	4	6
Suitable can diameter	53-66mm		
Suitable can height	70-175mm		
Main motor power	1.5Kw	3.7Kw	3.7Kw
Weight	1500Kg	2200Kg	2500Kg
Overall dimtion	1750*1140*1950mm	2320*1400*1900mm	2500*1600*1900mm
