

Capsule and Tablet Counting Machine

Intelligent Electronic Counting Machine is made by our company using the most advanced international vibration type channel feeding, oscillator stepless speed regulation, touch screen PLC intelligent control, optical fiber sensing probe counting, system self-test, automatic stop, and other advanced technology. The machine is made of stainless steel and designed according to GMP standards, and it is a high-tech pharmaceutical counting machine. It can be bottled, boxed and bagged and is fully compliant with GMP requirements, especially suitable for research institutes, hospitals, new small pharmaceutical plants and health care plants.

This machine is a quasi-tabletop type counting machine with reasonable design, compact structure, easy to use and high counting efficiency. It can be widely used in the fast counting bottling for a variety of different shapes and sizes of tablets, capsules, pills, transparent soft capsules and other drugs. The counting bottling accuracy has reached the advanced level of similar products at domestic and overseas.

Product parameter

Speed	800 - 2000 capsules/min
Application Scope	Hard capsules, soft capsules, tablets, pills, etc.
Control Method	Touch screen control
Counting Method	Fiber optic infrared detection
Applicable Size	Capsule Model 00#-5#
	Tablet Diameter 5-25MM
Bottle Size	Diameter 25-75mm, Height≤180mm
Counting Errors	±0.3%
Supply Voltage	220V/50-60Hz /100W
Net Weight (kg)	50kg
External Dimensions	735mm×580MM×720MM
Machine Material	Stainless steel of main parts material 304(0Cr18Ni9)
