

## *YB-CS200 Finished Product Take Away Conveyor*

Take away conveyor is usually use for transfer packed pouches bags to the rotary accumulation table from VFFS machine Made at highly sanitary design with stainless steel structure and PP material belt.

This machine is driven by imported micro motor. It has the characteristics of low noise, stable transportation and long service life. It can transport the finished products to the working platform. The machine shell is made of all stainless steel.

### **Features and Benefits**

- Flexible and fully adjustable
- Saves time by enabling operators to have more time packing and less time moving finished product
- Improves work environment by conveying the product to bench height, which reduces the need to pick product from filled bins
- Low profile design maximizes existing work areas with limited space

### **Technical parameters:**

<b>Model</b>	<b>YB-CS</b>
Transporting speed	15-60 bags/min
Power supply	1ph 220V, 50/60Hz
Power	50 W
Weight	40kg
