

Aerosol Filling Machine CM-AFM

CM-AFM aerosol filling machine, in the design of the contents will be semi-automatic filling machine, semi-automatic sealing machine, semi-automatic filling machine propellant (including booster pump) combined with the completion of a work platform, and any can work alone. Any two machine interaction work, can be adjusted. This Semi-automatic aerosol filling machine is usually used on aerosol filling. It is widely used in filling perfume, body spray, spray paint, air freshener and so on.

Technical Parameters:

Model	CM-AFM
For valves	1 " (25.4 mm)
Contents of the input connector	20 mm diameter stainless steel pagoda connector
Propellant filling volume (ml)	30-500
Propellant input connector	M22 * 1.5 Anti-teeth (for example, with standard 15KG, 50KG liquefied petroleum gas cylinder butt)
Filling accuracy	± 1%
Aerosol cans for height (mm)	70-330
For aerosol can diameter Diameter (mm)	30-65
Working pressure	5 bar
Maximum Air Consumption (m3/min)	1
Production capacity (cans / hour)	1200 -1600cans / hour
Packing size	1250mm*1400mm*2000mm
Weight	140kg
