

## Small Granular Sugar Premade Pouch Packing Machine

The Small Granular Sugar Premade Pouch Packing Machine is versatile and dependable since it is intended for different industries including hospitality, retail or food production. It ensures that every step starting from weighing, bag forming filling up to sealing and shaping happens with precision resulting in uniform pouches thus maintaining the quality of the packed sugar.

### Technical Specification

Machine Type	Automatic Premade Pouch Packing Machine
Suitable for	Small Granular Sugar
Pouch Types	Premade Pouches (stand-up pouches, flat pouches)
Packaging Speed	Adjustable, typically 30-60 pouches per minute
Pouch Size Range	Length: 80mm – 200mm, Width: 60mm – 150mm
Filling Capacity	Adjustable, typically up to 500g
Power Supply	220V/50Hz or customized
Power Consumption	Depends on machine size and configuration
Control System	PLC control system with touchscreen interface
Material	Stainless Steel 304
Air Pressure	0.6-0.8 MPa (6-8 bar)
Machine Weight	Depends on model, typically 300-500 kg
Dimensions (LxWxH)	Depends on model, typically 1200x800x1800 mm
Optional Features	Date/lot coding, nitrogen flushing, zipper seal
Safety Features	Emergency stop, overload protection, safety guards
