

## ***Automatic Round Bottle Labeling Machine SMTBJ-50***

Newest high technology table type automatic labeling machine for round bottle, it save space and high efficiency. With PLC touch screen operation, fast labeling speed to save workers and time.

Can work with other machines to make production line.

### **Advantages:**

1. Automatic fault stop function, production technology, saving power production, number setting prompt parameter setting and convenient production management.
2. Human-computer interaction interface with operation teaching function, parameter modification intuitionistic clear, various functions switching simple.
3. Good operation performance, excellent labeling effect, customer can rest assured to use.
4. Smart control for label and bottle detecting to avoid waste of labels.

### **Application:**

Suitable for different size of adhesive label or adhesive film on all kinds of round bottle, High accuracy and high speed, dispensing & labeling automatically.

Suitable range: Round bottle, Round tank, Round barrel to self-adhesive labeling.

It is used in PET bottle, plastic bottle, glass bottle, Metal bottle and so on round bottle etc.

### **Product discription:**

1. Small structure takes up less space and easy to move and load.
2. Good labeling precision and stability; Neat, no wrinkle, no bubble.
3. It has powerful function. It can achieve circumferential position labeling and non-position labeling easily by switch control.

4. It satisfy the circumferential position labeling and non-position labeling on diameter between 30-120mm bottles.
5. It is easy to use and adjust. The new workers can use or adjust it easily after simple training.
6. Conveyer parts are completely covered to avoid the abnormal conditions which make the use safer
7. The clever design which allow user to mechanically adjust some structure combination and label winding, makes it easy to adjust the labeling position freely. All these make it easy to change products and wind labels.
8. Whole equipment is mainly made of stainless steel 304, the whole structure is strong and harmonious.
9. Has fault stop function, production counting function.

**Technical parameters:**

Labeling precision	±1mm
Efficiency	20-200 piece/minutes
The size of work-piece	30-120 mm in diameter
Tag width	15-200 mm
Tag length	25-300 mm
Power supply	220 V 50 HZ
The motor power	1.5kw
Machine size	140 x 650 x 600 mm
Weight	120KG
