

## ROY-5P/10P Grab Type Carton Packing Machine

This is an intelligent fully automatic carton packing machine, controlled by PLC and friendly Human machine interface. With functions such as: Machine automatic stop if lack of bottles, no bottle no packing. Greatly reduce the labor force; it is a nice equipment to be working on the automatic line.

### Working process:

The bottles body are tightly clamped by the manipulator (rubber inside for protecting bottles), then exactly place into the opening carton, the cartons go outlet and are transported to the carton sealing machine while the manipulators go up.

- 1) Products are well arranged according to the individual carton packing requirement.
- 2) Widely application, suits for various products packed into carton.
- 3) For bottles, cases, bags, pails, etc.

### Technical Parameter:

Overall size (L/W/H)	2500*1200*2050 (mm)
Power	6KW
Voltage	AC3-380V/50HZ+G+E
Working temperature	-10℃~40℃
Auxiliary power supply	24VDC
Air pressure	0.4~0.6Mpa
Air consumption	1500L/Min
Weight	1000KG
